PROFESSIONAL SUMMARY

Recent BSc. Computer Science graduate and professional vibe coder, building full, working web applications by pairing AI-assisted development workflows with strong core skills in HTML, CSS, JavaScript, PHP, Bootstrap and MySQL. Has independently designed and shipped a general-purpose School Management System, an AI chatbot for school inquiries and admissions, and an automatic report card generator, alongside a full-stack CHPS compound patient management system built as a final year project. Reliable team contributor with practical field and administrative experience, and a track record of leading small technical teams to deliver working software on schedule.

EDUCATION

BSc. Computer Science 2023 – 2026

University of Technology and Applied Science (UTAS)

HND, Information and Communication Technology 2019 – 2022

Dr. Hilla Limann Technical University

WASSCE, Agricultural Science 2014 – 2016

Ullo Senior High School

EXPERIENCE

Field Assistant, Anwi Technologies Sep 2020 – Apr 2022

- Assisted with installation of CCTV, electric fencing, and intercom systems; supported computer networking and troubleshooting.

IT Assistant, Sungold Farm Limited 2020 – 2022

- Entered and maintained operational data on the company website; managed office records and database upkeep.

VOLUNTEER EXPERIENCE

Teaching Assistant, Department of Development and Training 2022

NONI HUB, Upper West Region

- Supported facilitation of training and development sessions for participants at the hub.

STEM4ALL, *Upper West Region* 2022

- Applied design thinking and research to investigate low IT literacy among junior high school students, then organized IT training for 50 students.

KEY PROJECTS

AI-Powered Voice-to-Text Emergency Reporting App *Hackathon Team*

Android · AI Voice-to-Text

- Core developer on a team building an Android app enabling people with disabilities to report emergencies using voice-to-text technology.

School Management System *Independent Build (Vibe Coded)*

PHP · Bootstrap · JavaScript · CSS · HTML · MySQL

- Built a general-purpose, web-based platform for basic schools in Ghana to manage students, grades, fees, and attendance in one system.

AI Chatbot for School Communication *Independent Build (Vibe Coded)*

- Built a website-based AI chatbot to handle school inquiries, admissions questions, and student support automatically.

Automatic Report Card Generator *Independent Build (Vibe Coded) Demo*

- Built a tool that calculates student grades and class positions and generates printable PDF report cards for basic schools; currently running as a demo.

CHPS Compound Management System Jirapa Municipal Health Center *Final Year Project, 2026*

PHP · Bootstrap · JavaScript · CSS · HTML · MySQL

- Designed and implemented a centralized, web-based patient registration and record-keeping system to replace a paper-based logbook process, addressing slow record retrieval, data loss risk, and fragmented visit histories.
- Built a searchable patient database with role-based, password-protected access for healthcare staff and administrators.

Help Desk System Zoom Lion Ghana Limited (Wa Branch) *HND Final Project*

- Led a team of three to design and develop a help desk system for issue tracking and resolution.

SKILLS

- AI-Assisted Development: Professional vibe coding, building complete, working applications by pairing AI tools with core engineering judgment
- Web Development: HTML, CSS, JavaScript, Python, PHP, Bootstrap, VB.NET
- Databases: MySQL, schema design and querying
- Tools: Git & GitHub, Microsoft Excel, Word, PowerPoint, Photoshop
- Design thinking, problem-solving, team leadership

LANGUAGES

- English, Dagaare/Waali, Twi
